### Project Details:

<b>Project-1</b>	<b>DESIGNER PORTAL</b>
<b>Client</b>	Shutterfly
<b>Role</b>	React Developer

**Description:** Shutterfly is an American based E-commerce company, which mainly delivers Photo Books, Prints, Personalized Cards, Gifts to their customers. In Shutterfly , Our Application is a Designer portal, where it handles mainly the designers data, designs and various design variants. Previously the Entire flows were done with legacy tech stack. Now, with the new Designer portal which we are building with react, designers can easily upload, update or work on their designs. Once these uploaded designs are finalized they will get directly mapped into the Shutterfly E-commerce website for the end users.

**Skills Used:** React, Jest, Material UI, Invision, Jira, Git, Swagger, node.js, Enzyme, scss.

### Responsibility:

- Understanding business requirements and translating them into technical requirements.
- Translating designs and wireframes into high-quality code.
- Developing the Requirement that fits the functional Scenario.
- Performance analysis and Optimizing components for maximum performance across a vast array of web-capable devices and browsers.
- Doing Unit Testing whether the Development Satisfies the Business Requirement.
- Attaching the Technical Design in Confluence , So that the Other developers may refer.

<b>Project-2</b>	<b>Chatbot framework</b>
<b>Client</b>	Value labs
<b>Role</b>	Full stack Developer

**Description:** Chatbot framework helps you to build, connect, publish, and manage chatbots, which are smart and interactive to give the best user experience. It comes with guided learning. You can use pre-existing, pre-built models to interact with your users. It is completely Based On Django Rest API in backend and Vue.js in frontend. In This Project i have Majorly contributed on Integration of Chatbot api Which is able to call different services like create, design, update and delete a chatbot. Once the chatbot is ready it can be Integrated with other applications with the help of Iframe.

**Skills Used:** Python,Html, Scss, JS, rest apis, Django, Integration Objects, node.js, vue.js, Web Services, Git, Swagger.

**Responsibility:**

- Understanding Business requirements.
- Learning and understanding user interactions.
- Designing a modern highly responsive web-based user interface.
- Building reusable components and front-end libraries for future use.
- Doing Unit Testing whether the Development Satisfies the Business Requirement.
- Coordinating with various teams working on distinct layers.

**KEY STRENGTHS:**

Strong Problem solving skills.  
Excellent communication skills, both verbal and written.  
Ability to be within a team.  
Willingness to learn new technologies.  
Self-Motivated and Goal Oriented.  
Flexible and adaptable.
