## OBJECTIVE

---

Seeking a position as an Front End Developer where extensive experience will be further developed and utilised.

## WORK EXPERIENCE

---

Enappd

May 2019 - June 2021

*Front End Developer*

Initially, enappd was a service-based company, so I was involved in the development of various client projects. Later at enappd we found a product, where I was working as a **team leader** and responsible for the Front end of their eCommerce website.

GEEKODAYA TECHNOLOGY PRIVATE LIMITED

June 2021 — Jan 2022

(Front End Focused)

I am working on various Internal Projects to manage all things on the app and web. Apart from this, I am responsible for their Educational Website for NoHub, which is generally based on React, Bootstrap and redux.

Q3 Technology

Jan2022- Present

ReactJS (Software Developer)

I am working on Projects where I manage all things on the web. which is generally based on React, Bootstrap and redux and graphQL.
